

NA1 Program

The NA1 Program requires classroom lecture, skills training, and clinical practice as part of the curriculum.

Our objective for the NA1 program is to prepare the students to properly and safely care for person in their care. Also, for the student to be proficient in the skills and knowledge needed to pass certification exams, clinicals, and become comfortable in their ability to properly perform necessary skills to assist people with ADL's.

Our objectives for the clinical experience at Springmoor Stewart Health Center are that students will participate in the basics of nursing care.

Also, continuously monitoring the residents for physical, mental, emotional and social changes and report any changes to the nurse.
